Dimensions: 0L x 0W x 250H

Description

Illuminate your retail space with our enchanting starburst LED light display, where each point of light creates a mesmerising constellation effect against any backdrop. The warm white glow radiates from 200 carefully positioned LEDs, producing a gentle luminescence that adds depth and character to interior settings. The silver cable and wiring blend seamlessly into contemporary décor schemes, while the innovative starburst design offers a fresh interpretation of traditional string lighting. Perfect for creating atmospheric displays in boutique window settings or adding ambient lighting to shelving and product displays. These lights work wonderfully when paired with our White Ceramic Tree Cut-Out Round Tealight Holder, Natural Wooden Hanging Star, and the collection of Ceramic Standing Star Decorations in various sizes. The combination of these complementary pieces allows for the creation of stunning layered lighting displays that will attract customer attention and drive sales. The energy-efficient LED technology ensures long-lasting performance while maintaining low running costs, making these lights an excellent investment for seasonal and year-round merchandising. Whether used as a standalone statement piece or incorporated into larger decorative arrangements, these lights provide the perfect solution for retailers looking to create inviting and professionally styled displays that resonate with modern consumers seeking distinctive home accessories.
