

Black Wood Large Window Mirror

This architectural mirror features precise black framing and clean lines that multiply light and space. Grid pattern adds industrial charm while maintaining modern appeal. Perfect centerpiece for design-focused spaces.

- Multi-panel design maximizes reflection
- Industrial-style framework
- Space-enhancing proportions

Code: 23336

Dimensions: 4L x 90W x 150H

Description

Making a dramatic architectural statement, this window-style mirror showcases a meticulous matte black wooden frame that adds depth and visual interest to any space. The deliberate proportions and grid pattern pay homage to classic industrial design while offering a fresh interpretation for contemporary interiors. The carefully considered framework divides the mirror surface into symmetrical sections, creating an illusion of expanded space and increased natural light. When paired with the Pella Table Lamp's geometric base or the sleek Inca Stem Table Lamp, this mirror amplifies the modern aesthetic of your space. For a cohesive design narrative, consider matching with the Lepts Magna Table Lamp, whose structured silhouette echoes the mirror's linear elements. The pristine mirror panels within each section deliver crystal-clear reflections, while the frame's robust construction ensures lasting quality. This mirror serves as both a functional piece and an architectural focal point, making it an invaluable addition to any retail collection. The adaptable design works seamlessly in both residential and commercial settings, from entryways and living spaces to boutique fitting rooms and hotel suites. Its ability to enhance spatial perception while maintaining visual balance makes it a sought-after piece for interior designers and discerning customers alike.
