Multi-layered petals with authentic curves and twists

Extended 80cm stem for flexible arrangement options

Deep burgundy color ideal for autumn and winter collections

Code: 22743

Dimensions: OL x OW x 80H

Description

Deep rich burgundy tones dance through this Spider Chrysanthemum stem, offering a dramatic addition to your floral collection. The intricate layers of delicate petals create an alluring display that captures attention in any setting. Each petal curves and twists with remarkable detail, mimicking the authentic movement of natural chrysanthemums. This artificial stem works beautifully with the Gunnii Blue Eucalyptus Spray to create depth, while the White Willow Spray adds contrasting texture. For a cohesive autumnal display, pair with the Burgundy Berried Eucalyptus and Variegated Maple Leaf. The rich color palette and botanical authenticity make this stem particularly appealing for seasonal displays, wedding arrangements, and high-end retail environments. Consider combining with our Large Cineraria Eucalyptus Spray for added fullness and the Black Chrysanthemum for a stunning monochromatic effect. The 80cm height provides ample opportunity for creating impactful arrangements that will entice your customers and enhance your product range.
