

Eryngium Blue Thistle

A single stem of soft, light blue faux thistle, chosen for its realism. Perfect for adding height and texture to an arrangement.

Chosen for its realism

Handcrafted

From the popular 'Recipe Collection'

Code: 19056

Description

Introducing a remarkably lifelike stem from the coveted Recipe Collection, this blue thistle stands as a testament to exceptional artificial floristry. The delicate, powder-blue petals cascade around the central cone, creating an authentic representation that captures the wild charm of Scottish highlands. Its thoughtfully crafted form provides the perfect accent for coastal and rustic arrangements, while adding architectural interest and textural depth to any display. For an inspired arrangement, pair this thistle with the White Gypsophila Spray for airy contrast, the Lambs Ear Spray for silvery undertones, and the Light Blue Agapanthus to create a cohesive color story. The addition of Eucalyptus Spray introduces a complementary sage tone that enhances the overall composition. This botanical selection proves particularly successful in retail environments, offering your customers endless creative possibilities for both traditional and contemporary styling.

Specification
