Pre-wired LED system saves setup time

Multi-tonal green needles mirror real fir trees

Commercial-grade construction ensures longevity

Code: 24137

Dimensions: 140L x 140W x 210H

Description

Experience the magic of winter with this enchanting pre-lit forest fir that creates an immediate festive focal point in any retail space. The dense, realistic branches radiate outward in a perfectly symmetrical silhouette, while 400 brilliant LED lights weave throughout the foliage, casting a warm and inviting glow that eliminates the need for additional lighting arrangements. The thoughtful design incorporates layers of branches that cascade naturally, mimicking the authentic growth patterns of forest firs. This artificial tree maintains its fresh appearance throughout the season and requires minimal setup time, making it an attractive option for both commercial displays and residential settings. The rich green colour spectrum varies from deep emerald to subtle sage tones, providing depth and authenticity that will appeal to discerning customers. For maximum visual impact, consider pairing with our collection of glass baubles in metallic finishes, traditional wooden ornaments, or our signature range of battery-operated woodland creature decorations. The LED lighting system harmonises beautifully with our selection of pre-lit garlands, wreaths, and table centrepieces, allowing retailers to create coordinated seasonal displays that drive additional sales. Our range of decorative tree skirts, specially designed storage solutions, and themed ornament collections offer excellent opportunities for complementary merchandising, ensuring strong attachment rates and increased basket values. This tree represents a reliable investment for retailers, combining commercial durability with residential appeal, making it a cornerstone product for any Christmas range.
