- Realistic fir branch construction

Code: 24133

Dimensions: 50L x 50W x 60H

Description

Welcome the magic of winter with this enchanting pre-lit woodland wreath that sets the standard for festive décor. The lush green fir branches create depth and dimension, while 100 sparkling LED lights weave through the foliage to cast a warm, welcoming glow. Each branch has been thoughtfully arranged to achieve perfect fullness and natural movement, creating an authentic woodland aesthetic. The circular design symbolises continuous life and celebration, making it an ideal focal point for entryways, living spaces, or retail displays. The pre-wired LED system eliminates setup complexity while ensuring reliable illumination throughout the season. This wreath pairs beautifully with our collection of battery-operated woodland candle holders, frosted pine cone garlands, and illuminated deer figurines. For a cohesive holiday display, consider matching with our metallic berry picks, rustic wooden ornaments, and snow-dusted artificial greenery. The combination of traditional evergreen styling with modern LED technology appeals to both traditionalists and contemporary decorators, making it a reliable choice for retailers seeking inventory that satisfies diverse customer preferences. The quality construction ensures the wreath maintains its appearance throughout extended display periods, while the built-in timer function offers practical energy management for retail environments.
