Metal framework with geometric detailing
Stable wooden platform base

LED candle compatibility

Code: 24088

Dimensions: 9L x 9W x 10H

Description

Cast in weathered metal with an intricate star design, this luminous centrepiece marries rustic authenticity with contemporary styling. The geometric star pattern creates mesmerising shadow play when illuminated, while the substantial wooden base provides stable grounding and introduces an organic element to the overall composition. Perfect for creating atmospheric lighting in retail displays, hospitality venues, or residential settings, this candle holder demonstrates exceptional attention to detail in its construction. The interplay between metal and wood textures offers a compelling visual narrative that resonates with current interior styling trends. For safety and longevity, the holder is specifically designed for LED faux candles, making it an ideal choice for commercial environments. To create a cohesive display, consider pairing with complementary metalwork accessories such as wall-mounted tea light holders, decorative wire baskets, or vintage-style lanterns. The industrial-meets-pastoral aesthetic works particularly well with copper or brass accents, making it an excellent companion piece to metal photo frames, mirror surrounds, or decorative bowls. The versatility of this piece allows it to serve as both a functional lighting solution and an artistic focal point, ensuring year-round appeal and making it a valuable addition to any retail inventory.
