

Large Snowy Fir Tree

Experience winter magic with this snow-covered fir tree. Perfect centerpiece for holiday displays. Pairs beautifully with our metallic stag collection.

- Snow-dusted branches with crystalline finish
- Adaptable for modern and classic displays
- Multi-season décor potential

Code: 23122
Dimensions: 13L x 20W x 35H

Description

A magnificent winter scene comes to life with this snow-dusted fir tree, showcasing delicate crystalline details that shimmer in ambient light. The artful application of faux snow creates depth and dimension across each branch, mimicking the serene beauty of a frost-kissed forest. This centerpiece pairs exceptionally well with our collection of coordinating metallic stag ornaments, particularly the graduated sizes of silver standing stags that add movement and grace to any display. For a cohesive winter wonderland theme, consider combining with our white ceramic fir trees and snowy spindle trees in wood logs, creating layers of texture and visual interest. The carefully crafted branches and realistic silhouette make this tree an ideal focal point for seasonal displays, while its neutral winter palette ensures seamless integration with both traditional and contemporary holiday décor. Perfect for retail environments seeking to create immersive seasonal displays that resonate with customers looking for statement holiday pieces.
