

LED Winter Wreath With Eucalyptus And Lambs Ear

Winter magic meets modern design in this LED-enhanced wreath. Frosted eucalyptus and lamb's ear create ethereal depth. Self-lit display piece perfect for any setting.

- Built-in LED illumination
- Frost-touched foliage blend
- Day-to-night functionality

Code: 22748

Dimensions: 41L x 41W x 60H

Description

This luminous winter wreath merges rustic charm with modern LED technology, creating an atmospheric glow that enhances any seasonal display. The careful arrangement of silvery eucalyptus leaves and soft, textured lamb's ear foliage provides depth and visual interest that catches both natural and artificial light. The intertwining of these botanical elements creates subtle shadows and highlights, making it an ideal focal point for entryways, mantels, or retail displays. For trade customers, this piece represents exceptional value, offering your customers a designer-quality decorative item that seamlessly blends traditional wreath styling with contemporary lighting innovation. The neutral color palette ensures broad market appeal, while the combination of frosted and matte textures adds sophisticated dimension. This wreath pairs beautifully with our curated selection of complementary accessories, including the matching LED winter garland, smoked midnight glass candle holders, and natural glow LED tealight candles. The addition of the Darcy antique white vase nearby creates a cohesive seasonal display that will entice customers to make multiple purchases. The wreath's ability to transition from day to night makes it particularly valuable for retailers, as it effectively demonstrates its dual functionality during store hours and evening displays. The built-in lighting element eliminates the need for additional display lighting, saving on installation costs while creating an enchanting atmosphere that draws customers to your seasonal department.
