Rustic Metal Tree Candle Holder On Wood Stand

Metal tree holder pairs rustic charm with modern design. Creates magical light patterns with LED candles. Perfect for all-season styling and display arrangements.

- Durable metal construction with authentic wood base
- Safety-focused LED candle design
- Multi-seasonal merchandising potential

Code: 24085
Dimensions: 8L x 8W x 8H

Description

This distinctive metal tree candle holder merges rustic appeal with contemporary design, showcasing intricate metalwork that casts enchanting shadows when illuminated. The organic branching pattern creates a mesmerising interplay of light and shadow, while the solid wood base provides a grounded, natural foundation. Perfect for creating atmospheric lighting displays in retail settings, this holder is specifically designed for LED faux candles, ensuring safety and longevity. The piece works beautifully alongside our collection of metallic accessories, including wire mesh lanterns, antiqued bronze decorative spheres, and hammered metal wall art. For seasonal merchandising, pair with our selection of LED pillar candles in varying heights, rustic botanical garlands, and weathered metal decorative birds to create an cohesive display that appeals to customers seeking authentic, countryside-inspired décor. The versatile eight-inch dimensions make it an ideal centre piece for table arrangements or as a standalone accent piece, while the neutral colour palette harmonises with both modern and traditional interior styles. Retailers will appreciate the year-round appeal and the opportunity to refresh displays seasonally with complementary accessories.
