

Silver Apple Ornament

Gleaming silver apple ornament reflects light with lifelike detail. Creates instant visual impact in any setting. Perfect complement to modern or classic decor.

Mirror-finish metalwork reflects surrounding elements

Matches with both ceramic and metallic decor pieces

Code: 22266

Dimensions: 15L x 15W x 16H

Description

A testament to modern metalwork artistry, this ornamental apple sculpted in polished silver makes an unforgettable statement in any retail display. The piece showcases meticulous attention to detail with its lustrous surface that catches and reflects light from every angle, creating an ever-changing visual experience. The realistic proportions and organic curves pay homage to classical still-life aesthetics while maintaining a contemporary edge that resonates with current interior trends. This decorative piece works exceptionally well when merchandised alongside the Olive Silver Ceramic Owl for a cohesive metallic theme, or paired with the White Washed Wood Photo Frame to create an appealing contrast of materials and textures. The ornament also coordinates beautifully with the Silver Skeleton Wall Clock, forming a collection that speaks to customers seeking a unified silver accent theme throughout their space. For an eye-catching display arrangement, consider grouping it with the Garda series of glazed vases, particularly the Emerald variants, where the interplay between metallic and ceramic finishes creates an engaging visual narrative that will entice your customers. This versatile accent piece appeals to both traditional and modern sensibilities, making it a reliable stock item that satisfies diverse customer preferences and maintains consistent sales throughout the year.
