- 200 integrated LED lights for reliable illumination
- Authentic woodland appearance with dense branch arrangement

Code: 24129
Dimensions: 91L x 91W x 210H

Description

Step into the enchanting world of winter décor with this slender silhouetted artificial tree, thoughtfully designed to maximise visual impact while conserving precious retail space. The dense arrangement of lifelike branches creates an authentic woodland appearance, each tip perfectly positioned to showcase ornaments and create magical depth. Pre-installed warm white LED lights weave through the foliage, casting a gentle glow that illuminates the tree's natural-looking textures and creates an ambient atmosphere perfect for both modern and traditional settings. This space-conscious design makes it an ideal choice for apartments, narrow corners, and compact display areas, ensuring broad market appeal. Pair with our collection of woodland-themed baubles, frosted pine cone garlands, and rustic wooden ornaments to create a cohesive forest-inspired display. Our metallic ribbon collection in copper and champagne tones perfectly complements the pre-lit arrangement, while crystal icicle drops add sparkle to the illuminated branches. For retailers seeking to create impactful seasonal displays, this tree offers excellent opportunities for creative merchandising and cross-category sales potential across decorative ranges.
