- LED system pre-installed
- Snow-coated needles
- Ready for immediate display

Code: 24138

Dimensions: 125L x 125W x 210H

Description

Create a magical winter wonderland atmosphere with this remarkably detailed Forest Fir, dusted with a generous layer of pristine snow that captures the essence of a serene December morning. The thoughtfully arranged 300 LED lights weave through the dense branches, casting a warm and welcoming glow that mimics starlight filtering through snow-laden boughs. Each branch has been carefully positioned to achieve the perfect silhouette, while the snow-tipped needles catch and reflect light in mesmerising patterns throughout the tree's impressive structure. This pre-lit masterwork eliminates the need for additional lighting arrangements, saving valuable setup time during the busy retail season. For maximum impact in your retail display, consider pairing with our collection of frosted pine cone garlands, mercury glass baubles, and crystal-effect icicle drops. The ice-blue and silver theme can be amplified with our range of LED light chains and frosted berry picks, while our collection of white feather decorations adds an ethereal quality to the overall display. The realistic snow effect creates endless opportunities for creative merchandising, particularly when combined with our range of woodland-themed tree decorations and cool-white LED accessories. This tree represents an excellent opportunity for retailers to create show-stopping seasonal displays that will draw customers in and drive additional sales of complementary decorative items.

Specification

Length:	125cm	Barcode:	5050140413883
