- Pre-installed lighting system requires zero setup
- Dense branch layout supports heavy ornaments
- Realistic snow effect maintains appearance throughout season

Code: 24139

Dimensions: 140L x 140W x 210H

Description

Welcome the magic of winter into your retail space with our enchanting pre-lit forest fir, dusted with a realistic snowy finish that catches and reflects the warm glow of 400 LED lights. This magnificent artificial tree creates an immediate focal point, with its densely layered branches and precise needle placement offering unmatched authenticity. The pristine white coating mimics freshly fallen snow, while the strategic placement of warm LED lights produces a gentle, welcoming radiance that illuminates the tree from within. Each branch has been designed to hold decorations securely, making it perfect for creative merchandising displays. For maximum impact in your retail setting, we recommend pairing this showstopper with our collection of glass icicle ornaments, crystal-encrusted snowflake decorations, and metallic baubles in silver and white. The addition of our LED light curtains and frosted pine cone garlands will complete the winter wonderland aesthetic. This tree presents an outstanding opportunity for retailers to create stunning seasonal displays that drive foot traffic and inspire customers to recreate the same magical atmosphere in their own homes. The pre-lit feature eliminates the hassle of separate light installation, making it an attractive option for both retail display and consumer use.
