Durable construction ensures long-term customer satisfaction

Smart storage solution with hidden drawer

Multi-room functionality with considered proportions

Code: 23953

Dimensions: 38L x 50W x 75H

Description

This minimalist side table demonstrates the refined simplicity that defines the Camden Collection. Featuring a single drawer design that merges function with refined aesthetics, this piece stands as a testament to understated British craftsmanship. The table's proportions create a balanced silhouette that works harmoniously in both traditional and modern settings, while its clean lines and considered dimensions make it an adaptable addition to any room. As part of the broader Camden Collection, this side table shares design elements with companion pieces, including the Half Moon 3 Tier Table, creating opportunities for cohesive interior styling. The considered scale makes it particularly suitable for intimate living spaces where every centimetre counts. For retailers looking to offer complete room solutions, we recommend pairing this piece with decorative items from our coordinating ranges - metalwork candlesticks, polished picture frames, and textured vases complement the table's understated grace. The drawer provides discreet storage while maintaining the overall clean aesthetic, appealing to customers who value both form and functionality. The table's construction reflects our commitment to quality materials and durability, ensuring customer satisfaction and minimal returns. This piece represents an opportunity for retailers to stock an item that appeals to diverse customer bases, from young professionals furnishing their first homes to established households seeking refined additions to their living spaces.
