

The Natural Garden Collection Pale Pink Scabious Stem

A lifelike pale pink scabious stem that mirrors spring's beauty. Creates stunning focal points in any floral display. Perfect match with white varieties and complementary stems.

- True-to-life petal formation
- Durable synthetic materials
- Color-fast and fade-resistant

Code: 23416

Dimensions: 17L x 21W x 65H

Description

Delicate pale pink petals unfold with remarkable authenticity on this botanical stem, bringing a whisper of spring into any interior space. The thoughtfully detailed scabious bloom sits atop a lifelike green stem, perfect for creating natural-looking arrangements. For an enchanting display, pair with the coordinating white scabious stems and purple sweetpea stems from The Natural Garden Collection. The arrangement reaches its full potential when styled in our Garda Glazed Eve Vase or Darcy Antique White Vase, complemented by fresh green Asparagus Fern bunches for added depth and texture.
