Realistic petal texture and coloring

Multi-stem floral clusters

Weather-resistant material

Code: 23423

Dimensions: 30L x 30W x 75H

Description

Delicate purple blossoms cascade with lifelike detail, making this lilac stem an outstanding choice for year-round floral displays. Each cluster of petite flowers mimics the authentic appearance and charm of freshly-cut garden lilacs, bringing an airy, romantic quality to any arrangement. This botanical treasure from the Natural Garden Collection pairs exceptionally well with the collection's White Magnolia and White Fritillaria stems for a balanced composition that suggests early summer abundance. For added depth, consider incorporating the White Waxflower or White Tea Rose stems, which complement the lilac's graceful silhouette. The pale lavender hues work particularly well when displayed in the Regola Stone Ceramic Vase, creating an arrangement that speaks of understated luxury and botanical authenticity. Whether styled as a standalone statement or combined with other stems from the collection, this artificial lilac stem offers retailers a product that appeals to customers seeking enduring beauty without maintenance concerns. Perfect for boutique florists, home decor retailers, and interior design specialists looking to stock premium artificial botanicals that maintain their appeal across seasons.
