

The Natural Garden Collection White Lilac Stem

Meticulously crafted white lilac stem with true-to-life petal clusters. Pairs effortlessly with other Natural Garden Collection pieces. Creates lasting botanical displays.

- Realistic petal arrangement with multiple flower clusters
- Season-spanning durability
- Multiple styling possibilities with complementary stems

Code: 23424

Dimensions: 30L x 30W x 75H

Description

Bring the majesty of blooming lilac into your space with this impeccably detailed artificial stem from The Natural Garden Collection. Each delicate cluster recreates the authentic appearance of fresh lilac blossoms, featuring subtle white petals arranged in graceful cascading formations. This botanical marvel pairs wonderfully with other white florals from the collection, including the ethereal Sweetpea stem, charming Bellflower, and the statement Magnolia stem, creating arrangements that embody serenity and refinement. For added dimension, consider combining with the textural Gypsophila spray and Viburnum Berry stems. The realistic green foliage provides a perfect backdrop for the pristine blooms. To complete the display, we recommend pairing with the Garda White Stefanie Vase, whose clean lines and lustrous finish harmonize beautifully with the stem's organic qualities. This artificial lilac stem offers retail customers an enduring botanical accent that maintains its fresh-picked allure throughout the seasons.

Specification
