

The Natural Garden Collection White Scabious Stem

A meticulously crafted white scabious stem that mimics its garden-grown counterpart. Perfect for year-round botanical displays. Pairs beautifully with complementary Natural Garden pieces.

- Authentic petal structure and natural movement
- Fade-resistant white blooms
- Maintenance-free garden aesthetic

Code: 23415
Dimensions: 17L x 21W x 65H

Description

Bring botanical precision to your floral displays with this remarkably authentic scabious stem in pristine white. Each petal demonstrates meticulous attention to detail, creating an appearance so lifelike it challenges reality. The stem's delicate flower head and textured foliage make it an exceptional choice for minimalist arrangements. For a cohesive display, combine with the coordinating white sweetpea stem and ranunculus from the Natural Garden Collection, or create depth by pairing with pale apricot hellebores. The addition of an asparagus fern bunch provides essential greenery, while the Darcy Antique White vase offers the perfect vessel for this refined arrangement.
