Realistic petal texture
Zero maintenance required

Multi-stem display potential

Code: 23378

Dimensions: 9L x 9W x 52H

Description

Bring botanical artistry to your retail space with this meticulously detailed White Butterfly Orchid Stem. Each petal exhibits a delicate translucency that mimics the ethereal beauty of natural orchids, while the graceful stem creates an illusion of organic growth. The pristine white blooms offer a fresh, minimal aesthetic that appeals to contemporary design enthusiasts. This artificial stem proves particularly impactful when styled in multiples, creating dramatic vertical displays that catch the eye. For an unforgettable visual presentation, we recommend pairing with the Chico Black Large Wire Mirror to create depth and reflection, or the Tall Black Triple Tulip Stem for dramatic contrast. The White Magnolia Stem makes an excellent companion piece, while strategically placed table lamps like the Pula or Inicia Stem can illuminate the arrangement to stunning effect. Perfect for high-end boutiques, interior design showrooms, and luxury retail environments, this artificial orchid stem promises steady year-round sales from clients seeking lasting floral arrangements that require no maintenance.
